EYE CENTRE

## **POST OPERATIVE EYE DROP INSTRUCTIONS**

### **Cataract Surgery**

You will be using eye drops for a total of 4 weeks

Eye drops to be used are:

- # 1. Chlorsig 0.5%
- # 2. Acular 5mg/ml
- # 3. Prednefrin Forte 1.2%

#### **Week ONE**

- ◆ Use all 3 bottles 4 times per day
- ◆ At the end of week one **stop drop #1** Chlorsig only

#### **Weeks TWO THREE and FOUR**

- ◆ Continue to use 2 bottles 4 times per day (#2 Acular and #3 Prednefrin Forte) for three more weeks

#### **Remember**

Wash your hands before instilling drops. Use a clean tissue. Keep drops in the fridge when possible. Shake the bottles first before instilling the drops. Allow one minute between each drop application.

Take extra care at home to prevent falling

**If you experience pain or loss of vision please  
contact your doctor immediately**
